Votre profil Web of Science

Créez un profil personnel pour :

- Revendiquer et mettre à jour son profil chercheur
- Sauvegarder ses historiques de recherche
- Sauvegarder ses alertes de recherche et de citations
- Conserver ses paramètres de recherche et d'affichage personnalisés
- Stocker des références dans Endnote Online
- Se connecter aux autres produits Clarivate

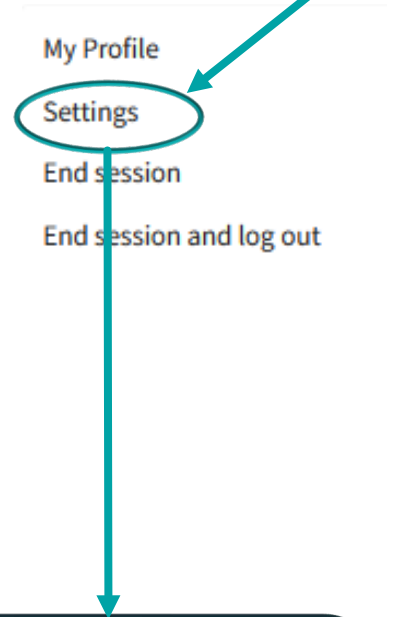

WoS : Ecran d'accueil : Le menu / Les paramètres

A partir du **Menu**, accéder directement à :

Vos références marquées (marked lists)
Votre historique de recherche
Votre profil chercheur : création et/ou accès
Vos recherches sauvegardées et vos alertes

Paramétrer votre compte WoS pour :

- Accéder directement à une base de donnée en particulier
- Sélectionner le tri par défaut des résultats de vos recherches
- Gérer votre login/password du WoS
- Décider d'afficher ou pas sur la page d'accueil du WOS : vos dernières recherches, vos dernières alertes, vos métriques, etc.

WoS : Ecran d'accueil

The screenshot shows the Web of Science homepage. At the top, there is a navigation bar with the Clarivate logo, language and product dropdowns, and a 'Register' button. Below this is a secondary navigation bar with 'Web of Science' and links for 'Search', 'Marked List', 'History', and 'Alerts'. The main content area features a search bar with a dropdown menu for 'Search in: Web of Science Core Collection' and 'Editions: All'. A list of databases is shown, with 'Web of Science Core Collection' highlighted. A dropdown menu for the selected database lists various citation indexes, with 'Emerging Sources Citation Index (ESCI)' highlighted. A sidebar menu on the left contains icons for home, search, history, profile, and notifications. A right-hand sidebar lists various services like 'Web of Science', 'Master Journal List', 'InCites Benchmarking & Analytics', 'Journal Citation Reports™', 'Essential Science Indicators', 'Reference Manager', 'EndNote', and 'EndNote Click'. A teal arrow points from the 'Products' dropdown to the right-hand sidebar. A teal arrow points from the 'Web of Science Core Collection' dropdown to the database list. A teal arrow points from the 'ESCI' dropdown to the search bar. A teal arrow points from a question mark icon in the footer to the bottom annotation box.

méthodologie de
recherche
documentaire

Méthodologie documentaire

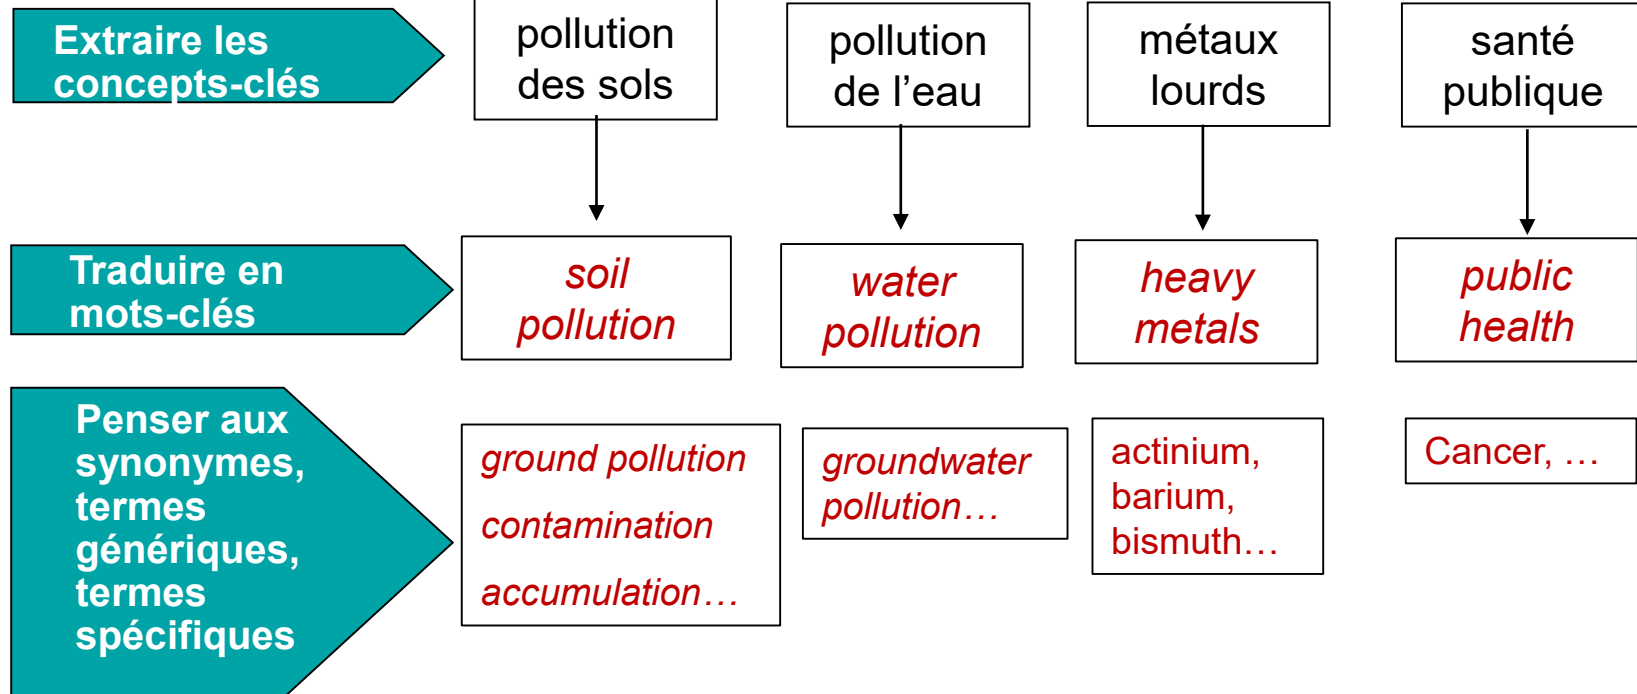

Exemple pour une interrogation thématique

Délimiter le sujet – Identifier les mots-clés

Effets de la pollution des sols et de l'eau par les métaux lourds sur la santé publique

Combiner les mots-clés

Utiliser les opérateurs booléens et de proximité (1)

AND	<ul style="list-style-type: none">• Réduit la recherche• Exemple : soil AND pollution
OR	<ul style="list-style-type: none">• Elargit la recherche• Exemple : soil OR pollution
NOT	<ul style="list-style-type: none">• Exclut de la recherche• Exemple : soil NOT pollution
SAME	<ul style="list-style-type: none">• Deux termes se trouvant dans la même phrase (champ address)• Exemple : INRAE SAME narbonne
NEAR	<ul style="list-style-type: none">• Deux termes à distance de x mots• Exemple : soil NEAR/5 pollution

Combiner les mots-clés

Utiliser les opérateurs booléens et de proximité (2)

« »

- **Les guillemets** = pour retrouver une expression exacte
- Exemple : « soil pollution » OR « ground pollution »

*

- **Zéro ou plusieurs caractères (avant ou après)**
- Exemple : *carbon* pour hydrocarbon, polycarbonate...

\$

- **Zéro ou un seul caractère**
- Exemple : colo\$r pour color, colour

?

- **Un seul caractère**
- Exemple : en?oblast pour entoblast, endoblast

()

- Parenthèses pour grouper des termes reliés par un opérateur booléen (« soil pollution » AND Africa*) NOT Algeria*

Le WOS applique automatiquement la **lemmatisation**. Elle est utilisée pour réduire ou éliminer le besoin d'utiliser des caractères génériques (?, *, \$) pour récupérer les **pluriels** ou les **variantes orthographiques** d'un mot (ex : producer/producers ; color/colour ; organisation/organization, etc.)₆

Combiner les mots-clés

Utiliser les opérateurs booléens et de proximité (4)

Effets de la pollution des sols et de l'eau par les métaux lourds pour la santé publique

Etape 1 : (Soil* OR ground*) AND (pollut* OR contamin* OR accumulat*)

Etape 2 : (Water* OR groundwater* OR "ground water*" OR sediment* OR mud*)

Etape 3 : ("heavy metals" OR actinium OR barium OR bismuth OR cadmium OR cesium OR chromium OR cobalt* OR copper* OR gallium OR germanium OR lead)

Etape 4 : ("public health" OR cancer)

"lead" homonyme "lead to"

Etape 5 : Etape-1 AND Etape-2 AND Etape-3 AND Etape-4

« Bruit » apporté par le langage naturel du WoS

Interrogation sur les composés chimiques ou des réactions

La recherche basique

The screenshot shows the 'DOCUMENTS' search interface. At the top, it says 'Search in: Web of Science Core Collection' and 'Editions: All'. Below this, there are tabs for 'DOCUMENTS', 'CITED REFERENCES', and 'STRUCTURE'. A search input field contains the text 'Topic'. A dropdown menu is open, listing various search fields: All Fields, Topic, Title, Author, Publication Titles, Year Published, Affiliation, Funding Agency, Publisher, Publication Date, Abstract, Accession Number, Address, Author Identifiers, Author Keywords, Conference, Document Type, DOI, Editor, Grant Number, Group Author, Keyword Plus *, Language, PubMed ID, and Web of Science Categories. A red box with an arrow points to the 'All Fields' option in the dropdown. To the right of the search input, there are two search boxes containing the text 'ranean'. At the bottom right, there are 'Clear' and 'Search' buttons.

Recherche sur X champs

Affiliation = recherche sur l'organisation

Address = recherche dans l'affiliation complète de l'auteur (organisation, UMR, ville, pays)

Attention...
Les « **keywords plus** » sont générés par un algorithme à partir des titres des références citées de l'article et peuvent fausser considérablement la pertinence des publications trouvées

Focus sur les mots-clés :

« Author keywords » et « Keywords plus »

- Le champ « **Topic** » permet de rechercher des termes simultanément dans les champs « Title », « Abstract », « **Author keywords** » et « **Keywords plus** » des articles.
Attention ces « keywords plus » sont générés par un algorithme à partir des titres des références citées de l'article et faussent considérablement la pertinence des publications trouvées.
- Pour les exclure : Faire une interrogation sur les champs « Title », « Abstract » et « Author Keywords » **sans les « Keywords plus »**.
TI=« climate change » OR AB = « climate change » OR AK = « climate change »
- A l'inverse faire une interrogation ciblée **en excluant les « Keywords plus »** :
TS = « climate change » NOT KP =« climate change »
Attention, cette syntaxe est déconseillée par le support de Clarivate Analytics car il y a exclusion des publications qui auraient « climate change » à la fois dans les « Keywords Plus » et dans les « Abstracts ».

The emerging concept of **bioeconomy** offers several opportunities to address societal challenges. The **bioeconomy** is mainly driven by advances in microbiology, which can be applied to various processes that use biological resources by shifting consumer preferences and by yielding new insights into resource constraints related to such issues as climate and land. Although expectations are high, less

Abstract		We investigate the potential in producing biodegradable bio-plastics to support the emergent 'net-zero' greenhouse gas (GHG) emissions targets in the UK. A 'cradle to grave' life cycle assessment was developed to evaluate GHG mitigation potentials of bio-

COMMENTS TO THE AUTHOR(S)
ERL-108798 review: Climate-smart biodegradable plastics would help 'Net-Zero' aspirations of UK agriculture

The manuscript evaluates GHG mitigation potentials of bio-based polybutylene succinate (PBS) plastics produced from a wheat straw-only (single feedstock) or wheat straw plus Miscanthus (mixed feedstocks) agricultural supply system for a specific region in the UK, using a life cycle approach. It extends previous research that analyzed 'feedstock pre-treatment to end-of-life' truncated life cycle impacts for the same system/region, by conducting a more complete LCA that includes feedstock production, and crop and soil carbon modelling of emissions from land use changes.

1 [Bioprocessing of organic wastes from poultry and bovine slaughterhouses as food substrate for *Hermetia illucens* larval development](#) **60** References

[Luperdi, AP; Flores-Calla, SS; \(...\); Reategui, JE](#)
2023 | [GLOBAL JOURNAL OF ENVIRONMENTAL SCIENCE AND MANAGEMENT-GJESM](#) 9 (1), pp.31-42

BACKGROUND AND OBJECTIVES: In the meat industry, inefficient management of organic waste exists, therefore the study aims to evaluate different bovine and poultry organic residues as food substrates during larval development of the black soldier fly, such as a sustainable alternative to obtain high protein meal. 1 [Effects of soil structure on pea \(*Pisum sativum* L.\) root development according to sowing date and cultivar](#) **22** Citations

[Vocanson, A; Roger-Estrade, J; \(...\); Jeuffroy, MH](#)

Mar 2006 | [PLANT AND SOIL](#) 281 (1-2), pp.121-135

Spring peas are known to be very sensitive to compaction, particularly when sowing takes place soon after winter. Winter peas, which are sown in autumn, should present an opportunity to sow the crop in better soil structural conditions than for spring peas, because of more favourable moisture conditions at that time. As environmental conditions have a big influence on root systems, it is import ... [Show more](#)

The screenshot shows the Web of Science interface for an author profile. At the top, the Clarivate logo and 'Web of Science™' are visible. The navigation path is 'Search > Author Records > Author Profile'. The profile is for 'Darmon, Nicole', with a verified status (green checkmark). Her Web of Science ResearcherID is AAC-4255-2019. Her profile picture is a circle with the initials 'ND'. Below the name, there are sections for 'Published names' (Darmon, Nicole, Darmon, N, Darmon, N., Darmon, Nelly), 'Published Organizations' (Universite de Montpellier, Aix-Marseille Universite, INRAE), 'Subject Categories' (Nutrition & Dietetics; Public, Environmental & Occupation Behavioral Sciences), and 'Other Identifiers' (ORCID: https://orcid.org/0000-0001-6625-4466). At the bottom, there are tabs for 'Documents' and 'Peer Review'. Under 'Documents', it shows '84 Documents' and a checkbox for 'Include publications not indexed in Core Collection (5)' which is checked.

4. J'ajoute ou je supprime des publications

The screenshot shows the 'My Web of Science' interface. On the left is a navigation menu with options like 'Marked List', 'History', 'Profile', 'My researcher profile', and 'My records'. The main area is titled 'My publication records' and includes a '+ Add publications' button. Below this, there are filters for 'Refine results' and 'Quick filters', including a checkbox for 'Web of Science Core Collection publications'. A search bar for 'Journals' is also present. The publication list shows a total of '61 publications with 334 citations from the Web of Science Core Collection.' and is sorted by 'Date: newest first'. One publication is highlighted: 'Cooperation in a Dynamic Setting with Asymmetric Environmental Valuation and Responsibility' by Mabel Tidball, dated 2022-09-01. It has 1 citation and a 'Delete' button. Another publication is partially visible below it, dated 2022-02-05, with a 'Not Indexed' status and a 'Delete' button. A 'During Period' filter is also visible at the bottom left.
